## Upgrades to WorkSight

New upgrades to the WorkSight portal will be implemented on August 2, 2019 as part of a commitment to continued enhancement of the stakeholder experience.

Changes should appear minor to the user; however, they allow for the implementation of additional work objects in future iterations of the WorkSight portal and enhancements related to tax applications and municipal enquiries. The user guide has been updated to reflect the new look and feel of the WorkSight portal to support new users unfamiliar with the former version.

We appreciate feedback provided as part of these upgrades and will continue to seek input in the future.
