Dear Property Owner:

On behalf of the Municipal Property Assessment Corporation (MPAC), I am writing to request specific information about the above-noted property.

MPAC's role is to assess and classify all properties in Ontario in compliance with the *Assessment Act* and regulations set by the Government of Ontario. While property assessments are updated on a four-year cycle, MPAC collects property information annually to ensure data accuracy and data currency.

To assist in developing accurate and fair market values for your property and other comparable properties, please submit the following information by **July 15, 2019**:

- An income and expense report on your property for your most recent fiscal year;
- A summary of all vacant areas and lost income due to vacancy and collection loss for your most recent fiscal year;
- Information from your current rent roll, for the most recent fiscal year, including but not limited to: suite type, number of units, monthly market rent, average unit size, and an indication of utilities and amenities included in the rent such as, heat, hydro, water, cable, air conditioning, internet, laundry, storage unit, and parking;
- A summary of additional charged parking spots, including: surface or indoor/covered, total spaces, and monthly rent;
- List of any commercial tenants, including but not limited to: tenant/trading name, unit types, unit number, leasable area for each tenant, current base rents, lease terms, lease commencement dates, rent free periods, tenant improvement allowances, and step-up rent options.

### **Assessing Multi-Residential Properties**

MPAC uses the income approach to value multi-residential properties. This method estimates the annual fair market rental income and other potential income that can be generated by the multi-residential property, deducts operating expenses and then applies a capitalization rate to the net income to arrive at an estimate of current value for the property.

In order to accurately and fairly value all properties in Ontario, MPAC builds a valuation model based on the following five primary valuation parameters: suite type, fair market rent and additional income, vacancy and collection loss, non-recoverable expenses and capitalization rate.
